

WATCHARAPOL PHONGWILAI

Software Developer

☎ 099-185-7733 @ ph.watcharapol@gmail.com 🌐 <https://github.com/rushmi0> 📍 Bangkok, Thailand

SUMMARY

Software Developer focused on Kotlin and the JVM ecosystem, building backend systems, with experience in workflow-driven applications and improving system setup and operations using Docker.

EXPERIENCE

Bright & Better Co., Ltd.

Systems Developer

📅 04/2025 - 04/2026 📍 Bangkok, Thailand

DevOps & Internal Tooling

- Reduced deployment configuration errors to near zero by building a custom Windows installer for legacy systems.
- Decreased environment setup time from several hours to under 15 minutes by containerizing legacy applications using Docker.

Manufacturing & Production Systems

- Built a Work Order Management system to track production timelines, machine allocation, and material usage.
- Developed lot-allocation logic to optimize container utilization, reducing storage waste and improving packing efficiency.
- Designed and implemented a reusable approval workflow module with email notifications, allowing it to be adopted across multiple projects 100%.
- Designed and enforced Role-Based Access Control to ensure secure and relevant data access across user roles.
- Developed a dynamic pricing and quotation system to handle fluctuating raw material costs and maintain historical pricing records.
- Implemented sales order, shipment, and invoicing modules to support end-to-end order fulfillment.
- Implemented a QR code-based picking system to improve accuracy in item retrieval.
- Built an invoice module supporting manual creation, including Credit and Debit Notes.

Contract & Revenue Management Systems

- Built a contract management system replacing spreadsheet-based processes, improving usability while supporting Excel imports for data migration.
- Developed version control for contracts, enabling users to track and compare historical changes.
- Developed an invoice generation module integrated with accounting systems, reducing manual data entry.
- Designed and built APIs to ingest and process revenue data from external systems.

Castrico Co., Ltd.

Mobile Developer (Internship)

📅 10/2024 - 12/2024 📍 Tokyo, Japan

- Developed an offline-first Android application for inventory tracking, improving usability for warehouse and field operations.
- Improved data lookup performance by optimizing QR code scanning and integrating local storage.
- Implemented CSV import/export functionality for efficient data backup and transfer.
- Built a user management system with role-based access control for administrative operations.

SKILLS

Languages

Kotlin, Java, JavaScript, SQL, NoSQL

Framework

Micronaut, Spring boot, KMP/CMP, React

Tools

Linux, Docker, Android Studio, JetBrains IDE
Git, Gradle, Excel Macro

PROJECTS

Nostr Relay

🌐 <https://github.com/rushmi0/Fenrir-s>

- Designed and built a Nostr Relay supporting the NIP-01 protocol for decentralized communication.
- Added support for NIP-50 (Search Capability), allowing efficient querying and retrieval of events.
- Architected the system to support scalable extensions for multiple Nostr Improvement Proposals (NIPs).
- Built the application to run on JVM and as native binaries, improving portability and deployment flexibility.
- Contributed to the Nostr ecosystem by simplifying relay deployment and encouraging adoption among Thai developers.

GENESEC

🌐 <https://github.com/rushmi0/genesec>

- Developed an application for generating Bitcoin WIF keys and Nostr key pairs securely.
- Implemented mnemonic (BIP39) generation, allowing users to choose between 12, 15, 18 or 24 word
- Built a time-lock smart contract for Bitcoin, enabling funds to be unlocked only after a specified block time.

EDUCATION

Information Technology (IT)

Thai-Nichi Institute of Technology
