

WATCHARAPOL PHONGWILAI

Software Developer

☎ 099-185-7733 @ ph.watcharapol@gmail.com 🌐 <https://github.com/rushmi0> 📍 Bangkok, Thailand

SUMMARY

Software Developer proficient in the **Kotlin ecosystem**. Experienced in system development, manufacturing logic, and infrastructure automation using Docker to improve operational efficiency.

EXPERIENCE

Bright & Better Co., Ltd.

Systems Developer

📅 04/2025 - 04/2026 📍 Bangkok, Thailand

DevOps & Internal Tooling

- Streamlined setup procedures for legacy software by creating a custom Installer on Windows, resulting in a 100% reduction in configuration errors and improved deployment reliability.
- Improved onboarding efficiency by containerizing legacy environments with Docker, reducing setup time from hours to minutes.

Manufacturing & Production Systems

- Developed a Work Order Management system to track production timelines, machine allocation, and material usage.
- Designed and implemented lot-allocation logic to fill partially empty containers before starting new ones, optimizing storage efficiency.
- Implemented a workflow approval system with email notifications for approvers and requesters.
- Developed a Dynamic Pricing & Quotation system to handle fluctuating raw material costs and historical price tracking.

Contract & Revenue Management Systems

- Developed a Waste Contract system supporting manual entry and bulk data processing via Excel imports.
- Implemented a revision history feature for contracts, enabling users to track and compare data changes across different versions.
- Implemented an invoice generation module and implemented data interfacing with accounting software (mcframeGA).
- Implemented API to ingest and process revenue data from external systems.

Castrico Co., Ltd.

Mobile Developer

📅 10/2024 - 12/2024 📍 Tokyo, Japan

- Developed an offline Android app for inventory tracking, focusing on ease of use for warehouse staff and field workers.
- Enhanced lookup speed, improving efficiency with QR code scanning and local data storage integration.
- Implemented CSV import/export enabling data backup without backend dependency.
- Implemented a User Account Management System, allowing administrators to create, modify, delete accounts, and enforce role-based access control.
- Built a Log System to track user activities for auditing and debugging purposes.

SKILLS

Languages

Kotlin, Java, C#, JavaScript, SQL, NoSQL

Framework

Micronaut, Quarkus, Spring boot, KMP

Tools

Linux, Docker, Android Studio, JetBrains IDE, Git, Gradle, Qodana, Excel Macro

PROJECTS

Nostr Relay

🌐 <https://github.com/rushmi0/Fenrir-s>

- Built Nostr Relay for a censorship-resistant global network per Nostr protocol.
- Created scalable architecture for NIP features and extensions.
- Aided Nostr ecosystem by easing relay setup and promoting adoption among Thai developers.

ZapPOS

🌐 <https://github.com/SiamDevTeam/ZapPOS>

- Developed a POS system using Compose Multiplatform to support both Mobile and Desktop from a single codebase.
- Used Nostr protocol for real-time ordering and data backup, enabling the app to operate without a dedicated backend.
- Focused on accessibility, ensuring the app runs on standard smartphones and PCs to provide a free tool for general users.
- Built inventory and order features, including product categories, pricing, and real-time basket calculations.
- Implemented transaction history to track past orders and verify sales data.

GENESEC

🌐 <https://github.com/rushmi0/genesec>

- Developed an application for generating Bitcoin WIF keys and Nostr key pairs securely.
- Implemented mnemonic (BIP39) generation, allowing users to choose between 12, 15, 18 or 24 words
- Built a time-lock smart contract for Bitcoin, enabling funds to be unlocked only after a specified block time.

EDUCATION

Information Technology (IT)

Thai-Nichi Institute of Technology

📍 Phatthanakan Bangkok
